Press release

BCGSoft Releases BCGControlBar Pro version 10.0

May 5, 2008 –St. Petersburg, Russia. BCGSoft Co Ltd today announced that BCGControlBar Professional Edition version 10.0 is available.

This is a major release that introduces many new features and enhancements including the long awaited Gantt Control, Skinned Dialog and Forms support, enhanced Vista Aero support, Planner Multi-Resource support, Grid and Report Control enhancements, new Ribbon Control gadgets and enhancements, new Progress Dialog component, revised MS Active Accessibility support, Explorer Toolbar with navigation buttons, improved Task Pane look.

Gantt Control.

Gantt Control is used to display tasks, appointments or other kinds of activities. It comes with integrated Grid Control and makes it easy to build scheduling as well as many other types of applications. The current implementation provides the developers with a rich set of features like different types of task objects, fully customizable appearance, unlimited time bar, task connectors, zoom in/zoom out, collapsible groups, print and print preview, drag & drop support.

Skinned Dialogs and Forms.

This feature allows easily apply skins to any dialog, dialog bar or form. All existing controls as well as many newly added controls can be displayed on a skinned dialog using the same visual theme.

Enhanced Aero Glass Support.

Now all controls, menu elements and other gadgets can be displayed on Aero Glass. It's possible to apply the Glass effect either to a whole dialog, or to any part of it with a single method call.

Planner Multi-resource support.

This feature allows to display appointments for several resources simultaneously. Now the Planer is suitable for complex scheduling applications dealing with many resources.

Grid and Report Control Enhancements.

The Grid and Report control became more powerful because they implement filtering capabilities, merged cells, "preview pane", advanced printing features and custom tooltips for groups.

New Ribbon Control Gadgets and Enhancements.

The Ribbon Control implements full keyboard navigation now. Other enhancements include the ability to customize Gallery context menu, enable and disable keyboard customization at runtime, the ribbon

slider can be displayed with various styles enabling the developers to add to the Ribbon equalizer-like controls.

Progress Dialog.

The new Progress Dialog component enables the developers to easily incorporate various types of Wait dialogs into their applications. An out of the box Progress dialog displays a progress indicator, percentage, owner draw header, animation and several messages. A dialog can be themed as any other dialog in the framework.

Revised MS Active Accessibility support.

The Active Accessibility support has been revised and fully implemented within the library. The most of the library controls are derived from a single class that encapsulates and virtualizes the Active Accessibility support.

Explorer Toolbar Control.

The new Explorer Toolbar control implements an Explorer-like toolbar with navigation (forward and backward) buttons. It's capable of remembering the navigation history and can display a popup menu with the history.
